

# What's all this talk about our Company Vision and Values?

---

Across the company, it is important everyone gets a good feel for what we want to accomplish and be known for. This is also known as the company vision and can only be realised through us all working together to make it happen.

## **Our vision:**

**To be the best leading security and services company in the country; and more importantly a company we are all proud to work for.**

Collectively working together includes our frontline, who are delivering the excellent day to day services for our clients and our leadership and support team at HQ, who ensure everyone works effectively together, and are offered the support they need (they also make sure we all get paid on time which is very important!).

Our vision of the future is what we want to achieve as a company while we grow and how we believe we can achieve this through applying and working in a certain way which are set out through our values.

Please visit our company website here <https://guk.co.uk/about-us/#vision> to get a feel for what we are passionate about accomplishing and the values we believe will play an important part to achieve it!

---

## Our Mission and Values are set out below:

### Mission

To be the UK's most respected security and service brand.  
To do this we will create a culture that supports our teams in superb professionalism and customer service.

To be recognised for providing superior professional and quality services that customers and clients recommend and our employees are proud of.

### Values

**Continuous  
Improvement**

**Integrity**

**Passion**

**Seamless Team  
Approach**

**Service Excellence**

**Understanding  
Through Partnership**

These values set the foundation of our company culture! They set out the way we believe we must behave and work while we deliver our services to our clients.

Hopefully, the vision and values resonate with everyone, and it is understood if we collectively believe and practice these values while at work, we will make our working day a happy one and the company will continue to grow to become the best, and most respected, security and services company in the country. Just as envisioned!
